Now Serving . . . The Coldest Beer in Town
With the New BD4 - Beer Cave Thermometer

The BD4, from Weiss Instruments, tells your customers what they want to see and that's Cold Beer and Beverages. The BD4 features a Jumbo 4″ **CoolBlu** LED Display viewable up to 150 Ft. away. Pre-calibrated with it's 10 Ft NSF sensor the BD4 can also be programmed to read out in °C. There are 3 display light levels and the 14.5″ x 6.25″ x 2″ sturdy metal case is quickly wall mounted with two slot screws. Not limited to just beer, the BD4 can measure and display temperature in a big way for any application. Outside temperature, pool temperature or at a large venue where you need to see the temperature from a distance. Now Global Warming and Cooling can be seen from a safe distance.

The complete kit includes a UL 120V power adaptor plug and a 10 Ft temperature probe with a .25″ x 2.5″ SST sensor.
